Profile

A Frontend Web Developer for an award-winning software specialist, actively involved in building the base frontend experience for various brands in the agricultural industry. Skilled in HTML5, CSS3 and JavaScript. Adept at learning new skills to produce the best product. Enjoys trying out new technologies and tinkering with TypeScript and React.

Relevant Work Experience

Frontend Web Developer, Ubiq Education, London

2023 - present

Using a bespoke CMS I create unique HTML components which build into beautiful sites for public schools. Using designs built in Sketch and directly with the designer, I build HTML structures which can be placed almost anywhere in a page, using the clients own copy and images.

Frontend Web Developer, Proagrica, Portsmouth

2018 - 2023

I met with Project Managers regularly to discuss requirements for the products being developed, to provide time estimates and technology suggestions. I provided continuous communication to meet tight deadlines. I was responsible for ensuring that new site designs are converted to pixel-perfect websites for our clients. I am also an advocate for using new technologies to speed up the development process, such as task runners, ES6 and SASS/SCSS.

Frontend Web Developer, Abacus E-Media, Portsmouth

2015 - 2018

As a Frontend Web Developer, I took responsibility for new clients on their Cloud platform, using detailed style guides in Adobe applications and creating or adapting complex, responsive HTML layouts. I worked with backend developers to ensure that new features or modifications are well build and if necessary. I was also responsible for providing support for any frontend issues and give advice regarding the implementation of features for existing clients. I built email templates for clients who wish to use email marketing software and integrate the templates into the software.

Web Developer, Brilens International Ltd, Portsmouth

2014 - 2015

I was responsible for the maintenance of a Magento e-commerce system utilising several storefronts. Using my skills as web developer I ensured that all content is up-to-date and correct. My role also included building new websites for clients alongside a team of graphic designers to produce striking sites which draw customers in, while maintaining the brand identity of both the client and the company.

Education

Portsmouth University	BSc Web Technologies	2013 - 2015
Chichester University	HND Computing and Software Development	2011 - 2013
Open University	Business Studies	2011
Open University	CertHE Mathematics and computing	2010
British Army	Leadership and Management	2005

Skills and attributes

Skilled in HTML, JavaScript, and CSS.

Knowledge of Adobe Photoshop, Adobe Illustrator and Adobe XD.

I have an excellent eye for detail, and I can think 'outside of the box' to overcome unforeseen problems. I am analytical and very quick to learn any skill.

I am very patient and remain calm and level-headed under intense pressure.

Enthusiastic and highly motivated.

I have had an interest in learning React for around 3 years and have I enjoy tinkering with sites that are already built and creating sites from tutorials. I am now looking to use the skills I have learnt in a commercial capacity.

Interests

- Reading
- Cycling
- Woodworking
- DIY
- I actively learn new skills by following online tutorials and by using online resources such as Udemy.
